Welcome to IOGCA 2019

Chemistry and Chemicals are integral part of **upstream** as well as **downstream Oil & Gas Industry**. They play a significant role in drilling, well completion, well stimulation, water shut off, flow assurance, crude oil demulsification, corrosion inhibition, effluent treatment, microbiological controls, injection water treatment, enhanced oil recovery etc. in upstream oil and gas drilling and production. In downstream processes, they play role in catalysis, lubricants and greases, additives, absorption and adsorption, cleaning systems, cracking and fuel technology, heat exchange systems, sludge handling, H₂S scavenging, pipeline transportation, solvents, polymers, corrosion inhibition, effluent treatment, microbiological issues etc. Chemicals are used as an oxygen scavenger, corrosion inhibitor, biocide, demulsifier, surfactants in several operations, solvents, paraffin inhibitor and dispersant, pour point depressant, drag reducer, polyelectrolyte, defoamer, deoiler etc. A broad range of chemicals has been developed by researchers and service providers to meet the challenges and provide new avenues. Chemistry of crude oil and water plays an important role in most of these applications of chemicals and hence their detailed analysis and characterization will also form a part of the discussion of this conference.

This is the **2nd edition of the conference on Oilfield Chemistry**. The **1st edition** was “**Indian Oilfield Chemistry Conference 2018**” in Ahmedabad on 27–28 September 2018. The 1st edition was **highly successful, 45 plus Speakers, 200 plus Delegates & 90 plus companies** from various countries like **USA, Russia, UK, Sweden, Australia, Malaysia** etc were present along with many branding partners.

IOGCA 2019 will provide an ideal platform for end users, industry, researchers, chemical manufacturers and academic experts to share experiences in managing the challenges that can be handled by chemicals and chemistry. This two day event will create opportunities for discussing and sharing new experiences in all aspects of chemicals and chemistry and is designed for industry professionals involved or interested in solutions for various challenges in **Oil and Gas production, processing, handling and value addition through chemicals and chemistry**.

Benefits to Attend IOGCA:

The conference will

- **Enable surpass conventional wisdom by leveraging chemical technologies**
- **Inspire by sharing ideas while connect chemists across the industry**
- **Transform new chemists in the field into valuable chemists by sharing ideas**

The other benefits that will accrue from this conference for the individuals and companies are:

- **Enhance your knowledge through interaction with industry experts**
- **Understand field experiences through case studies**
- **Update yourself with the new developments & applications**
- **Extend your learning**
- **Learn about new generation of chemical solutions**
- **Learn to select the optimum chemical solution for your field**

The platform will also provide a platform for the chemical manufactures and solution providers to display their innovative products and skills to a large number of participants.
